

Light is germ fighting

Florida dental practice adds an extra layer of protection against COVID-19 with OSRAM AirZing™ PRO UV-C fixtures

Project Overview

For Dr. William Geyer and Dr. Leslie Hernandez, health and safety always come first at their Lutz, Florida dental practice. To protect their patients and staff, the office ensures they maintain all the latest infection control protocols. When they learned about the OSRAM AirZing PRO UV-C fixtures and how ultraviolet UV-C technology has been proven effective against the novel coronavirus that causes COVID-19, they decided to take the initiative to install the fixtures and enhance the safety at their practice.

Because UV-C at the 254nm wavelength can destroy up to 99.9% of viruses and bacteria, the fixtures add to everyone's peace of mind. Even better, the extra disinfection step is completely seamless.

Using them couldn't be simpler: A programmable timer turns the fixtures on for an hour each night when the office is unoccupied. For added security, the fixtures are equipped with a motion sensor that automatically shuts them off if anyone should enter the room. Installation was also easy and straightforward, requiring only about four hours for their electrician to install them, given it was similar to installing standard fluorescent fixtures.

"I am very happy that I learned about the OSRAM AirZing PRO UV-C fixtures. My patients and staff are impressed and grateful that we have added this extra layer of disinfection for their health and safety."

William J. Geyer, DDS, PA

Goal:

Dr. Geyer and Dr. Hernandez wanted to ensure patient and staff safety by minimizing the risk of exposure to the SARS-CoV-2 virus that causes COVID-19.

Solution:

The practice installed OSRAM AirZing PRO 5030 UV-C fixtures – a cost effective solution that was easy to install, easy to use and certified for safety.

Project Highlights:

- Fixture installed in each of 5 treatment rooms
- Added fixture installed for reception area
- Simple installation – less than 4 hours
- Total cost under \$4 per sq. ft.
- Low operating costs
